

~~SECRET~~*Office Memorandum* • UNITED STATES GOVERNMENT

25X1A

TO : [REDACTED] Asst. General Counsel

DATE: 11 June 1954

FROM : Assistant Comptroller

OGC HAS REVIEWED.

SUBJECT: [REDACTED]

25X1A

1. There is returned herewith the draft of subject document with penciled notes and comments inserted thereon. It is recommended that phrases pertaining to "reimbursement" which appear throughout the document be deleted and that the general basis for computing reimbursements be shown in Paragraph M. It is further recommended that Paragraph M be revised along the lines indicated in the attached Rewrite.

2. Since the Agency's ability to fulfill reimbursable obligations is dependent upon annual appropriations, it does not appear desirable to make detailed commitments to reimburse for specific services for an indefinite period in an indefinite and unlimited amount. It is, I believe, both practical and desirable to establish general principles and a basis upon which reimbursements will be estimated, computed, and effected. However, the agreement must provide a method of translating such principles into concrete dollar estimates on an annual basis to enable the Agency to obligate funds and be in a position to discharge its financial commitments.

3. I would be glad to discuss these points with you in further detail if you desire.
